INDEXES

1997 SUBJECT INDEX

Activated carbon
Effect of Iron and Sulfur on Thermal Regeneration of GAC ..... .89:11:111
Fred S. Cannon, Vernon L. Snoeyink, Ramon G. Lee, and Gerard Dagois

Advanced oxidation
Evaluating an AOP for TCE and PCE Removal .... .89:8:41
Ali A. Karimi, Jeremy A. Redman, William H. Glaze, and Gary F.Stolarik

Aldehydes
Predicting the Formation of Aldehydes and BOM ..... .89:6:79
Rajendra D. Paode, Gary L. Amy, Stuart W. Krasner, R. Scott Summers, and Eugene W. Rice

Analytical methods
Evaluation of Optical Detection Methods for Waterborne Suspensions ..... .89:2:98
Virendra Sethi, Priyambada Patnaik, Pratim Biswas, Robert M. Clark, and Eugene W. Rice
(See also Letters 89:5:4)
Using Flow Cytometry to Detect Protozoa ..... .89:9:104
Rebecca M. Hoffman, Jon H. Standridge, Audrey F. Prieve, Joseph C. Cucunato, and Mat Bernhardt
Comparative Performance of Colisure ..... .89:9:112
Gordon A. McFeters, Susan C. Broadaway, Barry H. Pyle, Molly Pickett, and Yair Egozy

Arsenic
Predicting As Removal During Metal Hydroxide Precipitation ..... .89:1:75
Laurie S. McNeill and Marc Edwards
(See also Erratum 89:1:4)
Surveying Arsenic Occurrence ..... .89:3:105
Michelle M. Frey and Marc A. Edwards
Arsenic Removal by RO and NF Membranes ..... .89:10:102
John J. Waypa, Menachem Elimelech, and Janet G. Hering

AWWA
A Center for Excellence ..... .89:5:23
Face to Face with Jack W. Hoffbuhr
Facing the Future ..... .89:6:22
Face to Face with Bevin Beaudet

Backwashing
Regulating Filter Backwash Water ..... .89:8:14
Frederick W. Pontius
Modifying a Backwash Trough to Cut Media Loss During Filter Washing ..... .89:12:47
Susumu Kawamura, Issam N. Najm, and Karl Gramith

Biodegradable organic carbon
Ozonation and BDOC Removal: Effect on Water Quality ..... .89:2:84
Lori A. Cipparone, Alicia C. Diehl, and Gerald E. Speitel Jr.

Biodegradable organic matter
Predicting the Formation of Aldehydes and BOM .. .89:6:79
Rajendra D. Paode, Gary L. Amy, Stuart W. Krasner, R. Scott Summers, and Eugene W. Rice
Biological Filtration for BOM and Particle Removal: A Critical Review ..... .89:12:83
Daniel Urfer, Stephen D.J. Booth, Bradley M. Coffey, and Peter M. Huck

Biological processes
Biological Mechanisms in Slow Sand Filters ..... .89:2:72
Monroe L. Weber-Shirk and Richard I. Dick
Carboxylic Acids: Formation and Removal in Full-scale Plants ..... .89:8:88
Graham A. Gagnon, Stephen D.J. Booth, Sigrid Peldszus, Dennis Mutti, Franklyn Smith, and Peter M. Huck
Biological Filtration for BOM and Particle Removal: A Critical Review ..... .89:12:83
Daniel Urfer, Stephen D.J. Booth, Bradley M. Coffey, and Peter M. Huck

Bromate
Bromate Minimization During Ozonation ..... .89:6:69
Rengao Song, Paul Westerhoff, Roger Minear, and Gary L. Amy
Technical Note: Does Hydroxyl Radical Oxidize Bromide to Bromate? ..... .89:6:106
James M. Symons and Michael C.H. Zheng

Carboxylic acids
Carboxylic Acids: Formation and Removal in Full-scale Plants ..... .89:8:88
Graham A. Gagnon, Stephen D.J. Booth, Sigrid Peldszus, Dennis Mutti, Franklyn Smith, and Peter M. Huck

Chloramination
Chloramination: Its Effect on Distribution System Water Quality ..... .89:7:66
Cheryl D. Norton and Mark W. LeChevallier

Chlorate ion
Predicting Liquid Bleach Decomposition ..... .89:4:142
Gilbert Gordon, Luke C. Adam, Bernard P. Bubnis, Ching Kuo, Robert S. Cushing, and Richard H. Sakaji

Chlorine
Kinetics of Chlorine Decay ..... .89:7:54
John J. Vasconcelos, Lewis A. Rossman, Walter M. Grayman, Paul F. Boulos, and Robert M. Clark
(See also Erratum 89:11:4)

Chlorite ion

Evaluating Ferrous Iron for Chlorite Ion Removal . .89:8:98
Gregory H. Hurst and William R. Knocke

Committee reports

Committee Report: Research Needs for Small Water Systems: A Survey 89:1:101
Small Systems Research Committee

Committee Report: Transit-time Ultrasonic Flowmeters 89:7:104
AWWA Subcommittee on Ultrasonic Devices

Committee Report: Climate Change and Water Resources 89:11:107
AWWA's Public Advisory Forum

Computers

Technology Plans: A Smart Investment 89:4:124
Tully J. Anderson and Edward J. Amatetti

Electronic Communication: A Tool for Small Systems 89:6:10
Jim O'Neil

Testing the SANCHO Model on Distribution Systems 89:7:92
Patrick Laurent, Pierre Servais, Michèle Prévost, Dominique Gatel, and Bernard Clément

Consumer confidence reports

Consumer Confidence Reports: Opportunity's Knocking 89:4:12
Dallas Post

Communicating Water Quality With CCRs 89:9:18
Gerald M. Gilnack

Cryptosporidium

Reliability of Nonhazardous Surrogates for Determining *Cryptosporidium* Removal 89:5:90
Sylvana Y. Li, James A. Goodrich, James H. Owens, Gene E. Willeke, Frank W. Schaefer III, and Robert M. Clark

Expedited Microbial/Disinfection By-product Rules Defined 89:9:20
Frederick W. Pontius

Understanding Protozoa in Your Watershed 89:9:62
Christopher S. Crockett and Charles N. Haas

Protozoa in River Water: Sources, Occurrence, and Treatment 89:9:74
Stanley States, Kathleen Stadterman, Louis Ammon, Paul Vogel, Julie Baldizar, Denise Wright, Louis Conley, and Jan Sykora

Protozoa in Open Reservoirs 89:9:84
Mark W. LeChevallier, William D. Norton, and Thomas B. Atherholt

Crypto Research: Are Fundamental Data Missing? . .89:9:97
Patricia T. Klonicki, Carrie M. Hancock, Timothy M. Straub, Stephanie I. Harris, Keith W. Hancock, Ali N. Alyaseri, Charles J. Meyer, and Gregory D. Sturbaum

Using Flow Cytometry to Detect Protozoa 89:9:104
Rebecca M. Hoffman, Jon H. Standridge, Audrey F. Prieve, Joseph C. Cucunato, and Mat Bernhardt

Comparative Performance of Colisure 89:9:112
Gordon A. McFeters, Susan C. Broadaway, Barry H. Pyle, Molly Pickett, and Yair Egozy

So Many Oocysts, So Few Outbreaks 89:12:8
Floyd Frost, Gunther F. Craun, Rebecca Calderon, and Stephen A. Hubbs

Diatomaceous Earth Filtration for Removal of *Cryptosporidium* Oocysts 89:12:39
Jerry E. Ongerth and P.E. Hutton

Disinfection

Disinfection in the Americas: A Necessity 89:9:8
Horst Otterstetter and Gunther F. Craun

Disinfection by-products

DBP Occurrence Survey 89:6:60
Harish Arora, Mark W. LeChevallier, and Kevin L. Dixon

Enhanced Softening: Factors Influencing DBP Precursor Removal 89:6:94
Jeffrey D. Thompson, Mark C. White, Gregory W. Harrington, and Philip C. Singer

Preliminary Testing for Control of DBPs in Cleveland 89:8:78
Nicholas G. Pizzi and Margaret L. Rodgers

Dissolved organic carbon

Predicting DOC Removal During Enhanced Coagulation 89:5:78
Marc Edwards

Dissolved-air flotation

DAF Pretreatment: Its Effect on MF Performance 89:10:90
Anne Braghetta, Joseph G. Jacangelo, Shankararaman Chellam, Michael L. Hotaling, and Bruce A. Utne

Air Transfer Efficiency of Packed Saturators Used in DAF 89:12:71
Sandra Steinbach and Johannes Haarhoff

Distribution systems

Calibrating Hydraulic Network Models 89:2:42
Lindell E. Ormsbee and Srinivasa Lingireddy

Fire Flow Computation With Network Models . . .89:2:51
Paul F. Boulos, Lewis A. Rossman, Chun-Hou Orr, J. Erick Heath, and Michael S. Meyer

The Cost of Infrastructure Needs 89:3:55
Patricia Carroll Hertzler and Clive Davies

Communication Strategies for Pipeline Construction 89:7:38
Neal Price, James R. Melton, and Michael R. Stift

A Dual Water System for Cape Coral 89:7:45
Robert R. Gedman and David D. Kuyk

Kinetics of Chlorine Decay 89:7:54
John J. Vasconcelos, Lewis A. Rossman, Walter M. Grayman, Paul F. Boulos, and Robert M. Clark
(See also Erratum 89:11:4)

Chloramination: Its Effect on Distribution System Water Quality 89:7:66
Cheryl D. Norton and Mark W. LeChevallier

Service Lines: Their Effects on Microbiological Quality 89:7:78
Michèle Prévost, Annie Rompré, Hélene Baribeau, Josée Coallier, and Pierre Lafrance

Testing the SANCHO Model on Distribution Systems 89:7:92
Patrick Laurent, Pierre Servais, Michèle Prévost, Dominique Gatel, and Bernard Clément

Committee Report: Transit-time Ultrasonic Flowmeters 89:7:104
AWWA Subcommittee on Ultrasonic Devices

Dual distribution

A Dual Water System for Cape Coral 89:7:45
Robert R. Godman and David D. Kuyk

Distributing Reclaimed Water Through Dual Systems 89:11:52
Daniel A. Okun

Enhanced coagulation

Evaluating Criteria for Enhanced Coagulation Compliance 89:5:64
Mark C. White, Jeffrey D. Thompson, Gregory W. Harrington, and Philip C. Singer

Predicting DOC Removal During Enhanced Coagulation 89:5:78
Marc Edwards

Enhanced softening

Enhanced Softening: Factors Influencing DBP Precursor Removal 89:6:94
Jeffrey D. Thompson, Mark C. White, Gregory W. Harrington, and Philip C. Singer

Errata—1996

Erratum to: Influence of NOM Composition on Nanofiltration 89:2:4
James A. Nilson and Francis A. DiGiano

Erratum to: Characterizing Filter Media Mineral Coatings 89:2:4
Peter B. Merkle, William Knocke, Daniel Gallagher, Jodi Junta-Rosso, and Todd Solberg

Erratum—1997

Erratum to: Predicting As Removal During Metal Hydroxide Precipitation 89:1:4
Laurie S. McNeill and Marc Edwards

Facilities

The Cost of Infrastructure Needs 89:3:55
Patricia Carroll Hertzler and Clive Davies

Using Negotiated Guidelines in a Facility Upgrade 89:3:89
Nicholas G. Pizzi, Ronald O. Schwarzwalder, and John J. Sadzewicz

USEPA's Infrastructure Needs Survey 89:12:30
Clive Davies, Ralph T. Jones, Patricia Carroll Hertzler, and Dan L. Fraser

Ferrous iron

Evaluating Ferrous Iron for Chlorite Ion Removal 89:8:98
Gregory H. Hurst and William R. Knocke

Filtration

Creative Funding Brings RO to Small System 89:1:42
Barry W. Cress

Physical–Chemical Mechanisms in Slow Sand Filters 89:1:87
Monroe L. Weber-Shirk and Richard I. Dick

NOM Removal by Slow Sand Filtration Through Iron Oxide–coated Olivine 89:2:57
Chris R. McMeen and Mark M. Benjamin

Biological Mechanisms in Slow Sand Filters 89:2:72
Monroe L. Weber-Shirk and Richard I. Dick

New York City: To Filter or Not To Filter? 89:3:62
Daniel A. Okun, Gunther F. Craun, James K. Edzwald, Jerome B. Gilbert, and Joan B. Rose

Optimizing Treatment Through Fe and Mn Fractionation 89:4:162
Kenneth H. Carlson, William R. Knocke, and Kevin R. Gertig

Iron Oxide–coated Media for NOM Sorption and Particulate Filtration 89:5:100
Yujung Chang, Chi-Wang Li, and Mark M. Benjamin

Regulating Filter Backwash Water 89:8:14
Frederick W. Pontius

Pennsylvania's Filtration Evaluation Program 89:8:67
Phil J. Consonery, Donald N. Greenfield, and Joseph J. Lee

Microfiltration Bests Conventional Treatment . . .89:10:10
Robert de Haas

Microfiltration Operating Costs 89:10:40
Andrew R. Gere

Integrated Membrane Treatment in Alaska 89:10:50
James C. Lozier, Greg Jones, and William Bellamy

Nanofiltration: From Prototype to Full Scale 89:10:65
Claire Ventresque, Greg Turner, and Guy Bablon

Effect of Pretreatment on Surface Water Nanofiltration 89:10:77
Shankararaman Chellam, Joseph G. Jacangelo, Thomas P. Bonacquisti, and Barbara A. Schauer

DAF Pretreatment: Its Effect on MF Performance 89:10:90
Anne Braghetta, Joseph G. Jacangelo, Shankararaman Chellam, Michael L. Hotaling, and Bruce A. Utne

Arsenic Removal by RO and NF Membranes . . .89:10:102
John J. Waypa, Menachem Elimelech, and Janet G. Hering

Slow Sand Filtration: Still a "Timeless Technology" Under the New Regs 89:12:14
Stephen A. Tanner

Diatomaceous Earth Filtration for Removal of *Cryptosporidium* Oocysts 89:12:39
Jerry E. Ongerth and P.E. Hutton

Modifying a Backwash Trough to Cut Media Loss During Filter Washing 89:12:47
Susumu Kawamura, Issam N. Najm, and Karl Gramith

Evaluating Particle Counters 89:12:60
Patrick T. O'Shaughnessy, Michael G. Barsotti, James W. Fay, and Scott W. Tighe

Air Transfer Efficiency of Packed Saturators Used in DAF 89:12:71
Sandra Steinbach and Johannes Haarhoff

Biological Filtration for BOM and Particle Removal: A Critical Review 89:12:83
Daniel Urfer, Stephen D.J. Booth, Bradley M. Coffey, and Peter M. Huck

Finance

Financial Indicators Measure Fiscal Health 89:8:34
Jeffrey L. Jordan, Christopher N. Carlson, and James R. Wilson

The Revolving Loan Fund 89:11:28
Roundtable

Flavor profile analysis

FPA of Selected Odorous Compounds 89:4:131
Diana M.C. Rashash, Andrea M. Dietrich, and Robert C. Hoehn

Sensory GC Analysis of Decaying Vegetation and Septic Odors 89:4:150
Djanette Khiari, Sylvia E. Barrett, and I.H. (Mel) Suffet

Flow meters
Committee Report: Transit-time Ultrasonic Flowmeters 89:7:104
AWWA Subcommittee on Ultrasonic Devices

Fractionation
Optimizing Treatment Through Fe and Mn Fractionation 89:4:162
Kenneth H. Carlson, William R. Knocke, and Kevin R. Gertig

Ground Water Disinfection Rule
Update on the Ground Water Disinfection Rule . . .89:1:16
Bruce A. Macler and Frederick W. Pontius

Groundwater
Update on the Ground Water Disinfection Rule . . .89:1:16
Bruce A. Macler and Frederick W. Pontius

Hypochlorite
Predicting Liquid Bleach Decomposition 89:4:142
Gilbert Gordon, Luke C. Adam, Bernard P. Bubnis, Ching Kuo, Robert S. Cushing, and Richard H. Sakaji

Infrastructure
USEPA's Infrastructure Needs Survey 89:12:30
Clive Davies, Ralph T. Jones, Patricia Carroll Hertzler, and Dan L. Fraser

Iron
Optimizing Treatment Through Fe and Mn Fractionation 89:4:162
Kenneth H. Carlson, William R. Knocke, and Kevin R. Gertig
Evaluating Ferrous Iron for Chlorite Ion Removal 89:8:98
Gregory H. Hurst and William R. Knocke
Effect of Iron and Sulfur on Thermal Regeneration of GAC 89:11:111
Fred S. Cannon, Vernon L. Snoeyink, Ramon G. Lee, and Gerard Dagois

Iron and manganese
Optimizing Treatment Through Fe and Mn Fractionation 89:4:162
Kenneth H. Carlson, William R. Knocke, and Kevin R. Gertig

Iron oxide
NOM Removal by Slow Sand Filtration Through Iron Oxide–coated Olivine 89:2:57
Chris R. McMeen and Mark M. Benjamin
Iron Oxide–coated Media for NOM Sorption and Particulate Filtration 89:5:100
Yujung Chang, Chi-Wang Li, and Mark M. Benjamin

Leak Detection
Leak Detection: Cost-effective and Beneficial 89:7:10
Chris E. Leauber

Legislation/Regulation
Update on the Ground Water Disinfection Rule . . .89:1:16
Bruce A. Macler and Frederick W. Pontius
Reinventing a National Drinking Water Information System 89:2:16
Kristen Tilton and Jeffrey S. Rosen
Implementing the 1996 SDWA Amendments 89:3:18
Frederick W. Pontius
Future Directions in Water Quality Regulations . .89:3:40
Frederick W. Pontius
State Revolving Loan Fund Guidance Issued 89:4:18
Frederick W. Pontius
Microbial/Disinfection By-products Rules on Expedited Schedule 89:5: 18
Frederick W. Pontius
Information Collection Rule Monitoring to Begin . .89:6:12
Frederick W. Pontius
SDWA Limits Lead Content of Plumbing Materials 89:7:12
Frederick W. Pontius
Regulating Filter Backwash Water 89:8:14
Frederick W. Pontius
Expedited Microbial/Disinfection By-product Rules Defined 89:9:20
Frederick W. Pontius
Small System Compliance Technology for the SWTR 89:10:16
Frederick W. Pontius
Alternative Monitoring Guidelines Released 89:12:22
Frederick W. Pontius

M/DBP rules
Expedited Microbial/Disinfection By-product Rules Defined 89:9:20
Frederick W. Pontius

Manganese
Optimizing Treatment Through Fe and Mn Fractionation 89:4:162
Kenneth H. Carlson, William R. Knocke, and Kevin R. Gertig

Membranes
Creative Funding Brings RO to Small System 89:1:42
Barry W. Cress
Microfiltration Bests Conventional Treatment . . .89:10:10
Robert de Haas
Microfiltration Operating Costs 89:10:40
Andrew R. Gere
Integrated Membrane Treatment in Alaska 89:10:50
James C. Lozier, Greg Jones, and William Bellamy
Nanofiltration: From Prototype to Full Scale 89:10:65
Claire Ventresque, Greg Turner, and Guy Bablon
Effect of Pretreatment on Surface Water Nanofiltration 89:10:77
Shankararaman Chellam, Joseph G. Jacangelo, Thomas P. Bonacquisti, and Barbara A. Schauer
DAF Pretreatment: Its Effect on MF Performance 89:10:90
Anne Braghetta, Joseph G. Jacangelo, Shankararaman Chellam, Michael L. Hotaling, and Bruce A. Utne
Arsenic Removal by RO and NF Membranes . . .89:10:102
John J. Waypa, Menachem Elimelech, and Janet G. Hering

Microfiltration
Microfiltration Bests Conventional Treatment . . .89:10:10
Robert de Haas

Microfiltration Operating Costs 89:10:40
Andrew R. Gere
Integrated Membrane Treatment in Alaska 89:10:50
James C. Lozier, Greg Jones, and William Bellamy
Effect of Pretreatment on Surface Water Nanofiltration 89:10:77
Shankararaman Chellam, Joseph G. Jacangelo, Thomas P. Bonacquisti, and Barbara A. Schauer
DAF Pretreatment: Its Effect on MF Performance 89:10:90
Anne Braghetta, Joseph G. Jacangelo, Shankararaman Chellam, Michael L. Hotaling, and Bruce A. Utne

Microorganisms

Reliability of Nonhazardous Surrogates for Determining *Cryptosporidium* Removal 89:5:90
Sylvana Y. Li, James A. Goodrich, James H. Owens, Gene E. Willeke, Frank W. Schaefer III, and Robert M. Clark
Chloramination: Its Effect on Distribution System Water Quality 89:7:66
Cheryl D. Norton and Mark W. LeChevallier
Service Lines: Their Effects on Microbiological Quality 89:7:78
Michèle Prévost, Annie Rompré, Hélene Baribeau, Josée Coallier, and Pierre Lafrance
Understanding Protozoa in Your Watershed 89:9:62
